What is an SDS Print Review

A SDS print review is typically carried out on-site without fuss or office disruption to identify:

1. Exactly how many prints/copies are being produced by existing equipment.
2. The real and full costs of these print/copies to your business
3. Projected annual overheads

Testimonials

PG SECURITY SYSTEMS

*"SDS offered a very **cost effective package** to us for a brand new machine, which gave us superior print quality, faster print speeds and **superb service levels**.*

*In addition we now have a superb scanning feature which enables us to quickly scan multiple documents at once, even double sided and save to any computer of our choice. This has **changed the way we manage documentation**."*

powrmatic

*"The very simple and clear SDS print review was very beneficial in exposing the true costs associated with our existing print/copy/scanning facilities, proving we could take delivery of a new Konica Minolta scan/printer copier and **reduce our overheads**"*

Secret World Wildlife Rescue

*"With the help and advice we've had from SDS we've significantly **reduced our outsourced printing costs** and been able to produce literature tailored to our specific audience needs convincing us to take delivery of a new Konica Minolta scan/printer copier and reduce our overheads."*

CASE STUDY

"We have gained an enviable reputation for cost saving and efficiency", as the IT Manager of Garador explains.

GARADOR
The Garage Door People

The situation

Garador is one of the UK's largest manufacturers of Up & Over, Side-hinged, Sectional and GaraRoll roller garage doors. Our IT manager knew of SDS from a company he had previously worked for and quickly established that the support he was receiving from the incumbent supplier was not to the same standard that he'd experienced with SDS.

The SDS solution

With his encouragement, we looked at what we were spending on our existing contracts and whether SDS could improve on our current supplier. It became apparent that not only could we make some significant savings with SDS, but that they also had extremely cost effective software solutions to help our workflows.

The long-term benefits

With SDS advice and support we have gained many benefits in our office environment. Here are just a few:

- **One supplier of multi-functional devices and laser printers across our entire site**
- **Greater continuity with supplier and staff**
- **Improved productivity**
- **Reduced overheads**
- **Cost effective software solutions to help our workflows**

SDS has proven to be a local supplier that genuinely cares.
